106.6	235	21.4 mg	7 tablets	2,2 ml		
113.4	250	22.8 mg	8 tablets	2.3 ml	10: 5 notch, 5 teeth.: 1 measure	10/16"= 5/8"

With the Bottles it is recommended to use a 5 ml syringe to measure the doses more accurately. Take it after lunch or dinner. Do not take with fruit juice, lemonade or milk. In addition to Ivermectin you should take a Multivitamin that contains Zinc, Vitamin D, C and A, or give these individually. It is indicated to gargle and nasal washings post-exposure to places of high viral load.
